8 Godfrey. Also present Mayor Kitching, and Deputy Clerk McDowell. Absent: Clerk Venhuizen.
9

10 Motion by Trustee Graczyk to appoint Deputy Clerk McDowell as Clerk pro tem; seconded by
11 Trustee Godfrey. All in favor; none opposed. Motion carried.
12

13 MAYOR'S REPORT: Mayor Kitching had no report. Trustee Quinn requested a list of the
14 Economic Development Committee members.
15

16 CLERK'S REPORT: Deputy Clerk McDowell reported Clerk Venhuizen will place copies of
17 the 2007-2008 Board meeting schedule in the mailboxes of all Board members for review. There
18 are a few holidays that need clarification.
19

20 FINANCE REPORT: Trustee Graczyk reported: a) a list of bills dated March 26, 2007 will be
21 presented; b) the first draft of the new fiscal year budget was distributed to all Trustees for
22 review and comments, and a Finance committee meeting will be scheduled soon; c) a request for
23 authorization to purchase a new server, to replace the existing server, and appropriate routers and
24 hubs, for the Village and Police Department at a cost not-to-exceed \$22,000 with funds available
25 in the Police and Finance Departments budgets.
26

27 Trustee Graczyk introduced representatives of Intelligent Solutions, Inc., (ISI) Mokena, Illinois,
28 Mr. Mark Krueger, Account Representative and Mr. Troy Carrigan, Senior Technology
29 Specialist.
30

31 Mr. Krueger reported a technology review was performed of the networks in the Police
32 Department and Village Hall. The technology review found numerous security holes in the
33 configuration of the network as it is set up today. There is no security implemented on the Novell
34 server that currently sits on the network shared between the Village Hall and the Police
35 Department. Users have the ability to copy data from any machine or server on the network,
36 copy to a disk and take data including data from the Police Department. Firewalls that separate
37 your network from the Illinois State Police network are inadequate.
38

39 Chief Troy reported ISI was hired to assess the computer network because the network appeared
40 to be vulnerable to outside attacks, there was a lack of data backup and age of the system.
41 Mr. Carrigan reported the current server is 5-6 years of age and a new server would be good for
42 an estimated 4-5 years, with a four hour response time if the system crashes, plus the elimination
43 of viruses. Current backup is performed by copy and paste with no offsite protection of data, and
44 the proposed backup is by tape that can be stored offsite. Currently passwords are not changed
45 on a regular basis.
46

47 FIRE DEPARTMENT REPORT: Trustee Collins presented: a) a request for approval to paint
48 the apparatus bay at Station #1 at a cost not-to-exceed \$12,000, which includes power washing

51 the vacancy created by the permanent disability of a Lieutenant. If approved, this would take
52 effect with the swearing-in on April 30, 2007; c) a report on the train derailment on March 16,
53 2007 which involved six train cars, five of which carried Phosphoric Acid. The Fire Department
